

The unfolding of your words gives **light**.

- Psalm 119:130

160 million people  speaking about **1800 languages**

have **no Bible translation** work started.

It is estimated that

80%

of people are

Oral Communicators.

 *Render* is an oral Bible translation software that works by allowing translators to listen in a language they understand, translate orally into their mother tongue and record their translation.

Speeds up

the start of a project as there is

no need to develop an orthography

Allows portions of scripture to be
distributed in the community immediately

Greatly expands the pool of participants as

nonliterate language experts
can now be involved

Render was **launched** in
June of 2016
In partnership with

Faith Comes
By Hearing

Pioneer
Bible Translators

Seed
Company

 Acts as a workflow management system

 Incorporates all Bible translation roles

 Designed with the oral communicator in mind

 Made for people with varying levels of education, literacy and technological savvy
